

New Digital Opportunities

—
Marc Peters
CTO Energy, Environment & Utilities Europe, IBM Distinguished Engineer

AI/ML Foundations

AI/ML as the domain of the
academic and researcher.
Few applications for
everyday life.

AI/ML Today

AI/ML in widespread use to
enhance everyday life,
usually applied to specific
narrow problems or tasks.

AI/ML Tomorrow

Artificial general
intelligence and robotics
enables computers to
surpass the abilities of
humans at most physical
and mental tasks

AI

Augmented Intelligence

Unsupervised Learning

Deep Learning - Neural Networks

The evolution of AI

General AI
Revolutionary

Broad AI
Disruptive and
Pervasive

Narrow AI
Emerging

▼ We are here

2050 and beyond

What lies ahead?

AI Everywhere

Healthcare
Finance
Agriculture
Government
Education
Energy
Science
Business solutions

Deeper Insights

Data-centric systems
Distributed Deep Learning
Neuromorphic systems
Quantum computing
Homomorphic encryption
Machine foresight
Cognitive discovery

Engagement Reimagined

Human-machine
collaboration
New AI modalities
Augmented reality
Global trade logistics
Blockchain for payments

Personalization at Scale

Personalized healthcare
Micro-segmentation
Personalized finance
Targeted marketing
Personalized learning
Individualized solutions

Instrumented Planet

Environmental solutions
Digital agriculture
Connected cars
Geospatial-temporal data
and analytics
Smart sensors

Augment the creative process

Cognitive Fashion

CHEF WATSON™

“Morgan”

Enrich individuali- sation and interaction

Pepper the robot

CogniToys DINOS

Sesame Street

Transform Industries

Insurance

Energy

Enabling Technologies to Meet Future Needs

Cognitive Computing and Blockchain ensure system stability and efficiently process billions of transactions, while advanced Cybersecurity protects an increasingly vulnerable energy system against attacks

Control
billions
of devices

AI / Cognitive Computing

Trust
millions
of participants

Blockchain

critical national
infrastructure

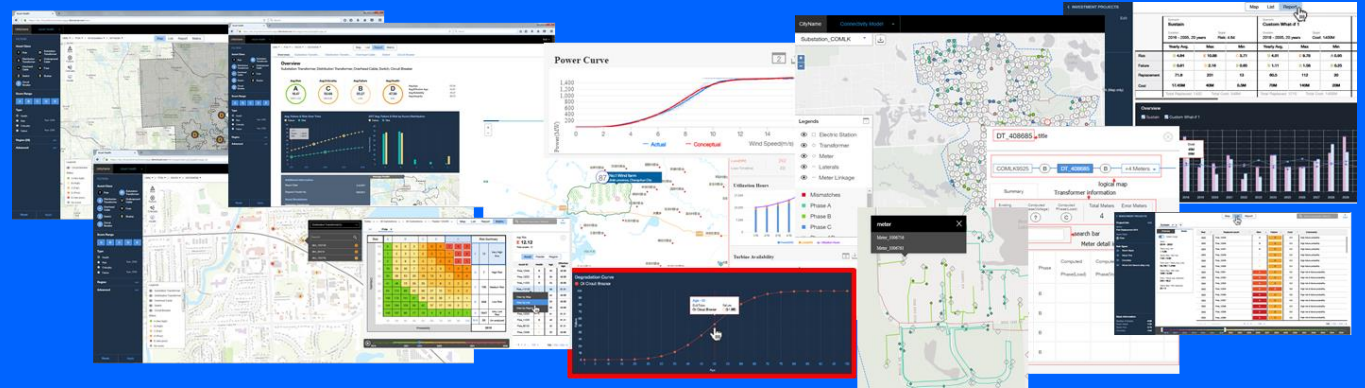

Cybersecurity

Machine Learning applied - Examples

Insights for Energy

Asset Performance Management
–Improved Reliability

Predictive Maintenance –
Optimize maintenance activities and speed

Asset Investment Scenarios and support investment planning

Situational Awareness –
What happens down to individual assets

Wind Farm Operations and Maintenance –
Situational awareness for wind farms

Connectivity Analytics –
customer to asset mapping report

“AIs are only as good as the data we train them with.”
